

VM BACKUP V9

Reliable. Powerful. Immutable.

NEW

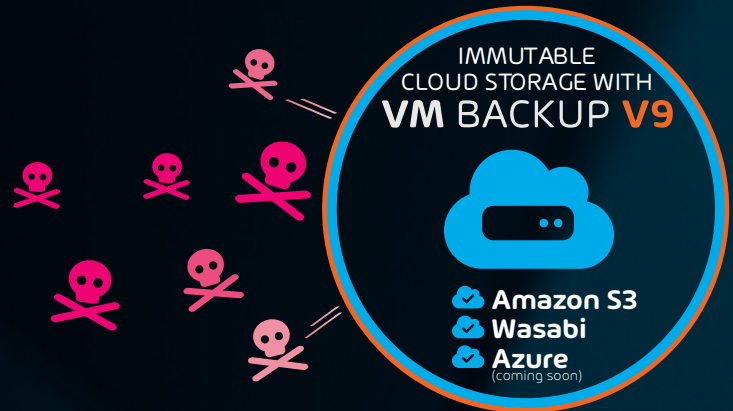

Ransomware Protection leveraging Immutable Cloud Storage

RANSOMWARE PROTECTION LEVERAGING IMMUTABLE CLOUD STORAGE:

VM Backup leverages immutable cloud storage assuring that data cannot be erased, modified, or deleted by anyone for a set duration.

- ✓ Tamper-proof backup data whilst under the defined immutable policy
- ✓ Data cannot be modified or deleted by any user, including admins or root users
- ✓ Peace of mind from ransomware attacks
- ✓ Extra layer of security above the existing offsite storage functionality
- ✓ No need for retaining unnecessary data and incurring high costs as retention operates seamlessly on the cloud repository

VM Backup is straightforward to use, while its powerful features make it a reliable solution to keep your data safe. Get a powerful backup and replication solution packed with robust functionality and great performance at an unbeatable value, backed by outstanding 24/7 support.

Augmented Inline Deduplication

Major storage space savings

WAN Optimised Replication

Centralized backup management

User-friendly web interface & easy set up

Backup and restore your company data with ease: at any time, with speed and massive storage savings.

Upgrading from VM Backup V8 to V9

Following the upgrade from VM Backup V8 to V9 a new set of backups will need to be taken from scratch. An upgrade wizard has been designed to facilitate the process for users and will migrate any existing configuration to the new VM Backup version.

The upgrade wizard will launch automatically.
